Exchange to Kyusyu, New Experiences and New Future

許滄維 -M10303237-

I felt very happy during this tour to Kyusyu industrial university, though it's not my first time to Japan, but it's my first time to Kyusyu. Kyusyu industrial university locates on the north of Kyusyu in Izuka city, it's a small but friendly city. The campus is placed on a small mountain and surrounded by trees and flowers. So every day we can enjoy the smell of the flowers and the fresh air during we walk to the school. In our class, Pro. Suzuki prepared two remote cars one with engine and another with motor to let us study the difference of engine and motor. And in the end of the class, we held a race between the two cars, it was really interesting.

We almost every night went to izakaya to have a drink, and we also enjoyed the Japanese sake and the horse meat, it was very delicious and tasted like beef. During the drink party, we made friends with Japanese students, although both of us were not good at English but we still chat happily. We also went to many places in the tour, for example, Fukuoka, Kumamoto castle, and visited some Japanese company. Though every day we went to our resident very late but we still felt not tire, because everything to us were new experiences.
